

YES, IT WORKS

The See II Air Foil for Horse Trailers

Are your horses and stock covered with *dust, road grime, rain, and snow* from being transported in your trailer? The See II Air Foil reduces this problem and keeps the rear of your trailer clean. By capturing and shooting two streams of clean air down the back of the trailer, the rear of the trailer and lights are kept clean, and dust, road grime, rain and snow is not allowed to reach your horses.

You will See the difference immediately!

Features

- Fits All Trailers
- No special tools required to install
- Half hour installation
